Re: Variation in NSW Government Waste and Environment Levy.

On July 1 2019, the NSW Government through the NSW EPA increased the Waste Levy imposed on the metal recycling industry. This is the charge imposed on metal recyclers when they dispose of waste that comes out of the process of metal recycling.

To remain sustainable in the face of these huge increases in operating costs, Sims was forced to increase its non-metal waste recovery charge.

Sims made strong representations to the NSW Government regarding these cost increases and the impact they have on our industry. As a result, the NSW Government agreed to reduce disposal costs to our industry by way of a concession on the waste levy paid by metal shredder operators to enhance recycling outcomes. As such, Sims will immediately pass on this cost saving to you. New rates are:

Material	Waste Recovery Charge July 01 2019	Waste Recovery Charge 6 th September 06 2019
#2 Light gauge and Car Bodies	\$55.00 Per Tonne	\$36.00 Per Tonne
Clean Light Gauge & Shredable Scrap – Minimal Waste	\$10.00 Per Tonne	\$6.00 Per Tonne

Rates Quoted Are GST Exclusive – GST Applies to Charges

If you would like to speak to someone about these changes, we encourage you to contact your Sims representative at your earliest convenience.

Kind Regards

Steve Black
